Branding Meets Customer Engagement

Why choose between branded labels and QR code labels when you can have both?

Our Custom Branded & QR Code Label Bundle helps restaurants create professional packaging that not only looks great but also encourages customers to take action.

Use branded labels to strengthen recognition of your restaurant and QR code labels to direct customers to your menu, online ordering page, Google reviews, loyalty programs, website, or social media channels.

Every order becomes another opportunity to promote your business, stay connected with customers, and encourage repeat business.

Built for Restaurants, Not Just Printing

Unlike traditional in-store and online printers, we've created a bundle specifically designed to help restaurants combine branding and customer engagement in one simple, cost-effective solution.

Most printers simply sell labels.

We help restaurants use labels as a practical marketing tool.

By combining custom branded labels with custom QR code labels, restaurants can strengthen their brand, promote online ordering, collect more reviews, grow their social media presence, and keep customers engaged long after an order leaves the restaurant.

It's a unique bundle designed around what restaurants actually need — not just what printers typically sell.

Customize Your Bundle Your Way

Every restaurant is different, which is why every bundle is fully customizable.

Choose different:

- Quantities
- Sizes
- Materials
- Designs

Order matching quantities or mix and match based on your needs.

For example, you can order 500 Branded Labels and 500 QR Code Labels, or 500 Branded Labels and 200 QR Code Labels. You can even select different sizes and materials for each product.

You decide what works best for your business.
