

Making Labels

Design Your Label in Minutes

Creating a professional custom label is fast and easy with our online design tool. Upload your logo or artwork, add text, choose colors, insert images or restaurant-themed clipart, and generate a QR code—all in just a few clicks.

Need help? Leave a note with your order and our design team will assist at no additional cost. If your artwork requires minor adjustments, we'll make them before printing.

VIP Members can instantly reorder saved designs anytime.

Accepted File Types

Both vector and raster artwork are acceptable. However, for the crispest print quality, vector files are the preferred format, though high resolution raster artwork is also suitable.

Supported formats: PNG, JPG, AI, GIF, SVG, BMP, PDF, TIFF, and PSD.

Designer Review

Every file is reviewed by our design team before printing. Your artwork isn't checked by an algorithm—it's reviewed by real designers who look for potential issues and make minor corrections when needed before your labels go to print.

For optimal printing, artwork should be at least **300 DPI**.

Color Information

Computer screens and phones display colors using **RGB (Red, Green, and Blue)**, while commercial printers use **CMYK (Cyan, Magenta, Yellow, and Black)** inks. Because your artwork must be converted from RGB to CMYK for printing, some colors may appear slightly different on the finished label than they do on your screen.

Vibrant Custom Labels

Your labels help represent your brand. We print every custom label with sharp details and vibrant colors to create a professional look that stands out on takeout packaging.

Water-Resistant Labels

Designed for takeout and delivery, our labels resist moisture, condensation, refrigeration, and daily handling. Colors stay vibrant, text remains clear, and labels maintain a professional appearance.

Food-Safe Printing

We use non-toxic inks designed for food-related applications, making our labels safe for restaurant takeout packaging.

Convenient Roll Labels

Because we specialize in restaurant takeout and delivery labels, all orders are supplied on rolls for easy storage, fast application, and maximum efficiency. Roll labels are the preferred choice for busy restaurants and high-volume takeout operations.
